VANSORB™ 1050

VANSORB™ 1050 UV Absorber is a liquid stabilization solution for candles, waxes and fragrances. **VANSORB 1050** absorbs UV light energy while assisting to prevent damage caused by free radical formation when a candle is exposed to light. It was also designed to provide demanding shelf life stability under various storage conditions.

VANDERBILT CHEMICALS OFFERS AN EXTENSIVE LINE OF STABILIZERS TO THE CANDLE INDUSTRY – **VANOX® ANTIOXIDANTS** AND **VANSORB™ UV ABSORBERS**.

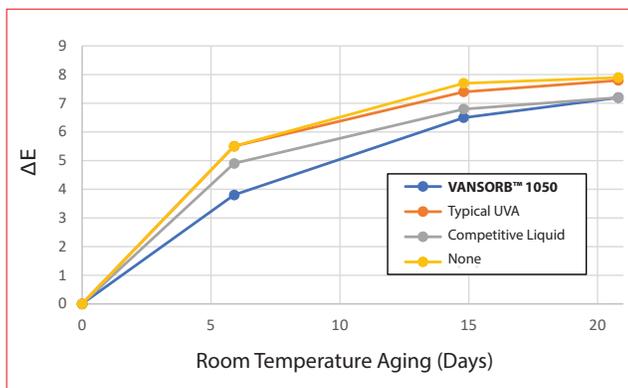

Scented paraffin wax candle formulation containing 0.2% stabilization in a light box with continuing exposure to black light for 72 hours.

Scented paraffin wax candle formulation containing 0.2% stabilization tested in the SunTest® XLS+ weatherometer using the StoreLight™ filter for 24 hours.

Scented 70/30 paraffin/soy wax candle formulation containing 0.2% stabilization in a light box with continuing exposure to black light for 72 hours.

Scented soy wax candle formulation containing 0.2% stabilization aging at room temperature.
