

# SAFETY DATA SHEET

**GHS** 

United States English

# Section 1. Product and company identification

**Product name** In case of emergency **VANCHEM® NATD** 

1-203-853-1400

Code Chemtrec: 1-800-424-9300

> Outside US: +1-703-527-3887

30 Winfield Street Norwalk, CT 06855

Vanderbilt Chemicals, LLC

45757

**Chemical name** 1,3,4-Thiadiazolidine-2,5-dithione, disodium salt

Disodium 2,5-dimercapto-1,3,4-thiadiazole in water Synonym

**Material uses** Metal Deactivator

Liquid. **Product type** 

Supplier/Manufacturer

## Section 2. Hazards identification

**OSHA/HCS** status While this material is not considered hazardous by the OSHA Hazard Communication

> Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available

for employees and other users of this product.

Not classified. Classification of the

substance or mixture

**GHS** label elements

Signal word No signal word.

**Hazard statements** No known significant effects or critical hazards.

**Precautionary statements** 

**Prevention** Not applicable. Response Not applicable. **Storage** Not applicable. **Disposal** Not applicable.

Hazards not otherwise

classified

None known.

## Section 3. Composition/information on ingredients

Substance/mixture Mixture

Ingredient name	CAS number	% by weight
water 1,3,4-Thiadiazolidine-2,5-dithione, sodium salt (1:2)	7732-18-5 55906-42-8	70 30

Occupational exposure limits, if available, are listed in Section 8.

Validation date 12/12/2023 12/12/2023 Date of previous issue 1/11

# Section 3. Composition/information on ingredients

## Section 4. First aid measures

#### **Description of necessary first aid measures**

**Eye contact** Immediately flush eyes with plenty of water, occasionally lifting the upper and lower

eyelids. Check for and remove any contact lenses. Get medical attention if irritation

occurs.

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get

> medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under

medical surveillance for 48 hours.

**Skin contact** Flush contaminated skin with plenty of water. Remove contaminated clothing and

shoes. Get medical attention if symptoms occur.

Ingestion Wash out mouth with water. If material has been swallowed and the exposed person is

> conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

Eye contact No known significant effects or critical hazards. Inhalation No known significant effects or critical hazards. Skin contact No known significant effects or critical hazards. Ingestion No known significant effects or critical hazards.

## Over-exposure signs/symptoms

Eye contact No specific data. Inhalation No specific data. Skin contact No specific data. Ingestion No specific data.

## Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician In case of inhalation of decomposition products in a fire, symptoms may be delayed.

The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments No specific treatment.

**Protection of first-aiders** No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

## **Extinguishing media**

Suitable extinguishing

Use an extinguishing agent suitable for the surrounding fire.

media

**Unsuitable extinguishing** 

media

None known.

Specific hazards arising from the chemical

In a fire or if heated, a pressure increase will occur and the container may burst.

Validation date Date of previous issue 12/12/2023 12/12/2023

## Section 5. Fire-fighting measures

Hazardous thermal decomposition products

Decomposition products may include the following materials:

carbon dioxide carbon monoxide nitrogen oxides sulfur oxides metal oxide/oxides

Special protective actions for fire-fighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable

training.

Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions** 

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and materials for containment and cleaning up

**Small spill** 

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

## **Precautions for safe handling**

Protective measures
Advice on general
occupational hygiene

Put on appropriate personal protective equipment (see Section 8).

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

 Validation date
 : 12/12/2023
 Date of previous issue
 : 12/12/2023
 3/11

# Section 7. Handling and storage

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

**Control parameters** 

Occupational exposure limits

None.

Appropriate engineering controls

**Environmental exposure** controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

**Hygiene measures** 

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**Eye/face protection** 

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. Recommended: splash goggles

Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Body protection** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: lab coat

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** 

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Personal protective equipment (Pictograms)

Validation date : 12/12/2023 Date of previous issue : 12/12/2023 4/11

# Section 9. Physical and chemical properties

**Appearance** 

**Physical state** Liquid. Color Amber.

Odor Not available. Not available. **Odor threshold** 

pН 9.5

**Melting point** Not available. **Boiling point** Not available.

Flash point [Product does not sustain combustion.]

**Burning time** Not applicable. **Burning rate** Not applicable. **Evaporation rate** Not available. Flammability (solid, gas) Not available.

Lower and upper explosive

(flammable) limits

Not available.

Not available. Vapor pressure Vapor density Not available. Not available. **Density** 

1.22 **Relative density** 

Solubility Easily soluble in the following materials: methanol and acetone.

Soluble in the following materials: cold water.

Very slightly soluble in the following materials: diethyl ether.

Not available. Solubility in water Partition coefficient: n-Not applicable.

octanol/water

**Auto-ignition temperature** Not available. **Decomposition temperature** Not available. **SADT** Not available. Not available. **Viscosity** 

## Section 10. Stability and reactivity

Reactivity No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability** The product is stable.

Possibility of hazardous

reactions

Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid** No specific data.

**Incompatible materials** No specific data.

**Hazardous decomposition** 

products

Under normal conditions of storage and use, hazardous decomposition products should

not be produced.

Validation date Date of previous issue 12/12/2023 12/12/2023 5/11

# Section 10. Stability and reactivity

# **Section 11. Toxicological information**

## Information on toxicological effects

## **Acute toxicity**

Product/ingredient name	Result	Species	Dose	Exposure
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	LD50 Dermal	Rat	>2000 mg/kg (Based on tests of similar materials)	-
	LD50 Oral	Rat	930 mg/kg (Based on tests of similar materials)	-

## **Irritation/Corrosion**

Not available.

## **Conclusion/Summary**

**Skin** 1,3,4-Thiadiazolidine-2,5-dithione, sodium salt (1:2): Non-irritating to the skin.

(Rabbit)

**Eyes** 1,3,4-Thiadiazolidine-2,5-dithione, sodium salt (1:2): Non-irritating to the eyes.

(Rabbit)

#### **Sensitization**

	Route of exposure	Species	Result
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	skin	Guinea pig	Not sensitizing (Based on tests of similar materials)

## **Mutagenicity**

Product/ingredient name	Test	Experiment	Result
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	OECD 490	Experiment: In vitro Subject: Mammalian-Animal	Negative (Based on tests of similar materials)

## **Carcinogenicity**

Not available.

## **Reproductive toxicity**

Not available.

## **Teratogenicity**

Not available.

## Specific target organ toxicity (single exposure)

Not available.

 Validation date
 : 12/12/2023
 Date of previous issue
 : 12/12/2023
 6/11

# **Section 11. Toxicological information**

## Specific target organ toxicity (repeated exposure)

Not available

#### **Aspiration hazard**

Not available.

Information on the likely routes of exposure

Routes of entry anticipated: Oral, Dermal, Inhalation, Eyes.

#### Potential acute health effects

**Eye contact**No known significant effects or critical hazards.
Inhalation
No known significant effects or critical hazards.

**Skin contact** May be harmful in contact with skin.

**Ingestion** No known significant effects or critical hazards.

## Symptoms related to the physical, chemical and toxicological characteristics

Eye contactNo specific data.InhalationNo specific data.Skin contactNo specific data.IngestionNo specific data.

#### Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate Not available.

effects

Potential delayed effects Not available.

**Long term exposure** 

Potential immediate Not available.

effects

Potential delayed effects Not available.

## Potential chronic health effects

Not available.

GeneralNo known significant effects or critical hazards.CarcinogenicityNo known significant effects or critical hazards.MutagenicityNo known significant effects or critical hazards.TeratogenicityNo known significant effects or critical hazards.Developmental effectsNo known significant effects or critical hazards.Fertility effectsNo known significant effects or critical hazards.

## **Numerical measures of toxicity**

## **Acute toxicity estimates**

Route	ATE value
Dermal	2500 mg/kg

 Validation date
 : 12/12/2023
 Date of previous issue
 : 12/12/2023
 7/11

#### **Toxicity**

Product/ingredient name	Result	Species	Exposure
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	Acute EC50 55.1 mg/l (Based on tests of similar materials)	Algae	72 hours
,	Acute LC50 >100 mg/l (Based on tests of similar materials)	Fish	96 hours

### Persistence and degradability

Product/ingredient name	Test	Result		Dose		Inoculum
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	OECD 301F		eadily - 28 days ests of similar	-		-
Product/ingredient name	Aquatic half-life		Photolysis		Biodeg	radability

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
1,3,4-Thiadiazolidine- 2,5-dithione, sodium salt (1: 2)	-	-	Not readily (Based on tests of similar materials)

#### **Bioaccumulative potential**

Not available.

**Mobility in soil** 

Soil/water partition coefficient (K<sub>oc</sub>)

Not available.

Other adverse effects

No known significant effects or critical hazards.

# Section 13. Disposal considerations

## **Disposal methods**

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

## Section 16. Other information

**Hazardous Material Identification System (U.S.A.)** 

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material.

**National Fire Protection Association (U.S.A.)** 

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
